## Honey Badger Description

### Size

Total length- 30-40 Inches

### Weight

Male- 20-30 Pounds

Female- 12-22 Pounds

Diet- Carnivore.

Habitat- Semi-desert to rainforest

Lifespan- 5 to 8 years, 25 years if held in captivity

## Why They're Endangered

- The main reason they're classified as endangered in the Red Species Data List is because a conflict has arisen between Honey Badgers and beekeepers in South Africa. Most conflicts occur in the Western Cape of Africa. 83% of Honey Badgers in the Western Cape were killed by beekeepers.
